ENGINEERING DEPARTMENT

JUSTIFICATION for INCREASE IN FEES, RATES, AND CHARGES

NOTE 1:

Fees, rates, charges to recover costs for these types of fees/reimbursements for public improvements are proposed to be increased 5.60% above current fees, rates, and charges to be consistent with the percentage increase in the Construction Cost Index from December 2003 to December 2004 as published by the Engineering News-Record. The proposed fees have been rounded off and, therefore, the actual percentage increase may vary slightly from 5.60%.

NOTE 2:

When the current rate was established in 1984, the Council decided that new connections would only be charge $\frac{1}{2}$ the then cost of Water Pollution Control Plant (WPCP) capacity, i.e., \$1.40 per gallon per day rather than \$2.80 per gallon per day. The latest actual cost for new capacity from the WPCP is now in excess of \$9.30 per gallon per day, an increase of 232% since 1984. Additional plant capacity issues will require added increases in the near future. The proposed increases are 20% above current fees as long as the new fees do not exceed cost recovery. The proposed fees have been rounded off and, therefore, the actual percentage increase may vary slightly from 20%.

NOTE 3:

Fees, rates, charges to recover costs for these types of Engineering services are proposed to be increased up to 20% above current fees, rates, and charges as long as the new fees does not exceed cost recovery. The proposed fees have been rounded off and, therefore, the actual percentage increase may vary slightly from 20%.
